I- Choose the correct answer : (½ pt / correct answer)

- 1- In Merise method, which expression is false for the word Attribute?
 - a- Is present in the Conceptual Data Model.
 - b- Means occurrence.
 - c- Must be described in the data dictionary.
 - d- Is present in the entities.
- 2- In CDM, the cardinalities (1,1) :
 - a- Symbolizes the dependence and relativity.
 - b- When transfered to LDM plays the same role as 1,1.
 - c- Both answers a and b are correct.
 - d- None of the answers.
- 3- In the data dictionary, there are:
 - a- Only elementary data.
 - b- Only calculated data.
 - c- Elementary data and calculated data.
 - d- None of the answers.
- 4- Which CDM (Conceptual Data Model) is correct for Walid to marry Leila a second time after their divorce?

- 5- Which expression is true?
 - a- An association must not contain 1,1 cardinalities.
 - b- An association only connects at maximum 2 entities.
 - c- An association must have cardinalities m,n.
 - d- An association is a relationship between entities.
- 6- In Merise, LDM means:
 - a- Library with Didactic Model.
 - b- Logical Data Model.
 - c- Liberty Demographic Model.
 - d- None of the above answers.
- 7- Which LDM is correct for the following CDM: (A person gives only one answer to a question)?
 - a- INDIVIDUAL (Code_Ind, LName_Ind, FName_Ind, Phone)
QUESTION (CodeQuest, QExplanation)
ANSWER (AnsCode, AExplanation)
ANSWERS (Code_Ind#, CodeQuest#, AnsCode#)
 - b- INDIVIDUAL (Code_Ind, LName_Ind, FName_Ind, Phone)
QUESTION (CodeQuest, QExplanation)
ANSWER (AnsCode, AExplanation)
ANSWERS (Code_Ind#, CodeQuest#, AnsCode#)
 - c- INDIVIDUAL (Code_Ind, LName_Ind, FName_Ind, Phone)
QUESTION (CodeQuest, QExplanation)
ANSWER (AnsCode, AExplanation)
ANSWERS (Code_Ind#, CodeQuest#, AnsCode#)
 - d- INDIVIDUAL (Code_Ind, LName_Ind, FName_Ind, Phone)
QUESTION (CodeQuest, QExplanation)
ANSWER (AnsCode, AExplanation)
ANSWERS (AnsCode#, Code_Ind#, CodeQuest#)

8- When there is a many-to-many relationship between two tables, it is necessary in LDM:

- a- Exchange primary keys.
- b- Merge the two tables into a single table.
- c- Create an intermediate table.
- d- All the answers are wrong.

9- What terms are used in MERISE ?

- a- Cell, Link, Object.
- b- Entities, Associations, FIC (Functional Integrity Constraint).
- c- Both answers a and b are correct.
- d- None of the above.

10- The data dictionary is a:

- a- List of data base fields.
- b- List of fields in a table.
- c- List of data base keywords.
- d- None of the above.

II- Treat the following questions:

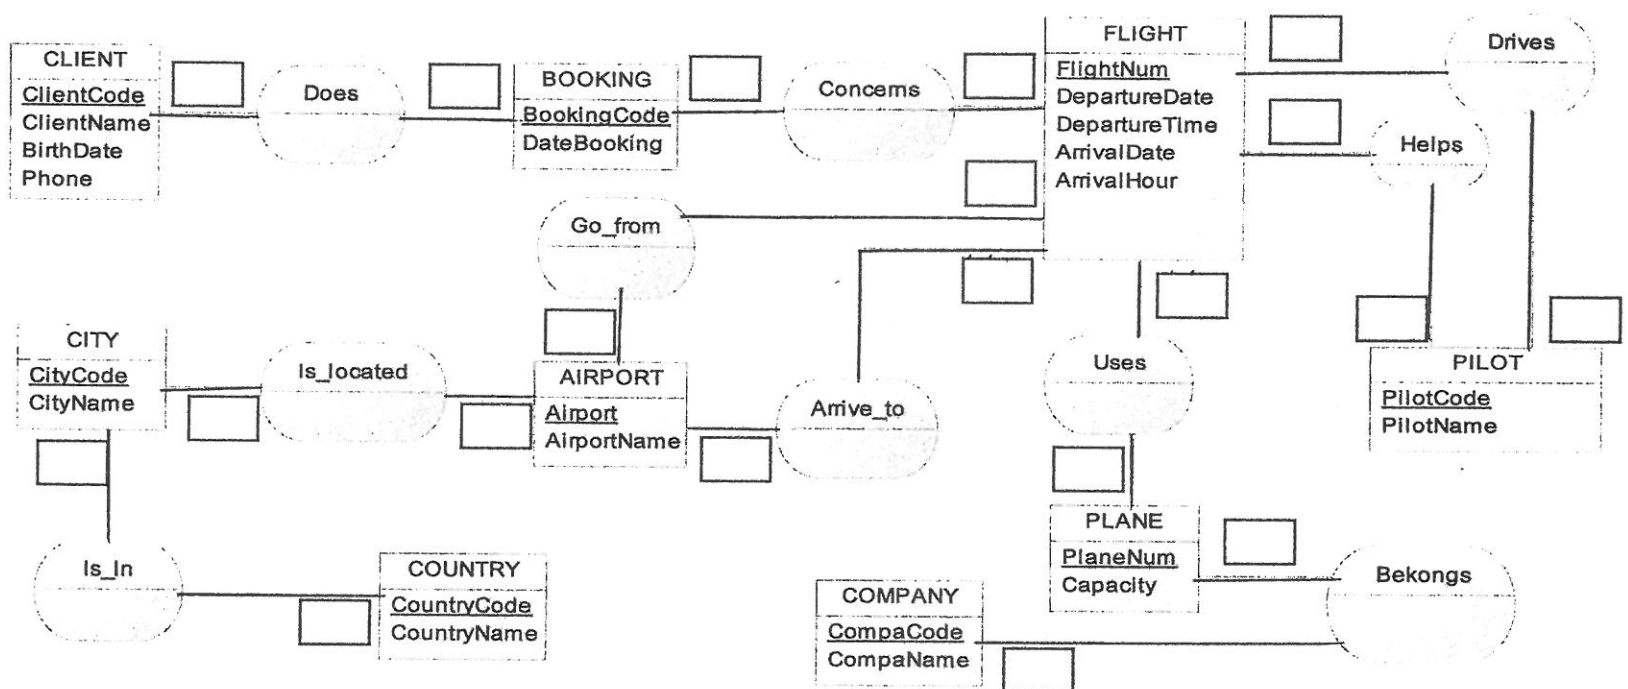

1- Travel agency:

(6 pts)

A travel agent performed the following CDM for the management of different customer bookings flights. But the agent forgot to assign cardinalities.

The customer can make several reservations, but one reservation per flight. A flight uses a single aircraft that belongs to a single company. The flight is performed by a single pilot and has only one co-pilot (helper). The plane makes several flights. It goes from one airport to another. The airport is in a city, which is relative (in its nomenclature) to a single country.

Set the cardinalities to the following MCD:

2- Build the CDM corresponding to the following case:

(5 pts)

A basketball player (code, last name, first name and phone) does or does not score baskets at specific times, in a match (which has a date). The match takes place in a stadium that has a name and is located in a specific city.

3- Transform the following CDM into a Logical Data Model (LDM):

(4 pts)
